

Another 1st in Legal Forms Software

New & Innovative

ADVANCED FORMATTING

- Set margins with first-line or hanging indents
- Select text direction, left right or centred
- Add bullet points or auto-numbering
- Increase or decrease paragraph width
- Control spacing between lines
- Copy and paste formatting
- Unlimited 'Undo' function

Introducing OyezForms Version 11

Format any text, in any form,
exactly the way you need it

Significantly reduce the
time it takes to format correctly

Benefit from Word functionality
in your standard forms

You asked us for greater format flexibility and after 9 months of development OyezForms Version 11 offers the functionality that no other forms supplier can provide.

- Align text direction - left, right, centre or justified
- Set margins, insert first line indents or hanging indents
- Control the spacing between lines & paragraphs
- Block indenting allows you to increase or decrease paragraph width
- Insert bullet points, auto-numbering or customised paragraph identifiers
- 'Copy' any format and repeatedly apply it to additional sections of your form
- Unlimited 'Undo' functionality allows you to perform multiple text undo's
- Applicable to any field in all Oyez forms (both rigid and flexi)
- All functions conveniently controlled by familiar toolbar menu functions
