

Press Release: 08 March 2018

Oyez Speech Now Offering DictateNow as an Integrated Transcription Solution

Oyez Speech and DictateNow have recently completed integration between their Digital Speech software and Transcription Services.

This collaboration will provide Oyez Speech users with easy, convenient access to a team of more than 300 professionally-trained, UK based typists. Both firms are ISO 27001 and ISO 9001 accredited, ensuring the safe transfer and handling of confidential data.

Authors in integrated firms will now be able to send speech files directly from their computer, via a secure cloud-based platform, as easily as if they were sending them to an in-house secretary. Upon receipt, the file is picked up by an experienced legal typist and when completed, returned to the client as an encrypted email attachment. Clients may also choose to have documents typed directly into their case or document management systems.

Oyez Speech will assist their clients with any required customisation and will provide support for all aspects of the integration.

Commenting on the partnership, Paul Clyde, Managing Director of Oyez Professional Services said **"We are delighted to have established this relationship with a market leader in legal transcription. I am sure that many of our speech clients will be able to benefit from this enhanced service"**.

Oyez Professional Services

Oyez Professional Services provide specialist products and services to legal and professional organisations, including more than 80 of the UK's top 200 law firms. Our objective is to deliver real value by using innovative technologies to develop solutions that transform the way legal practitioners capture, share and submit information.

Focusing on the challenges associated with the efficient and compliant completion of legal documents has allowed Oyez to develop specific expertise in the fields of legal forms software, the digital submission of data, dictation & transcription technologies and professional document reproduction.
